Game is unstable and regularly crashed in the middle of long levels with no save/recovery. Came concept if great (basically Culdcept Saga clone) and the humor and art is ok. I would actually play this whole game and enjoy it, but the current technical state make it a pure waste of time. Avoid.. My most recent achievement is "No hard feelings. It's all business."

XD

I'm not mad the dev did a runner, the game has a full single player campaign and I paid very little for it. Plus its kinda fun.. Game is unstable and regularly crashed in the middle of long levels with no save/recovery. Came concept if great (basically Culdcept Saga clone) and the humor and art is ok. I would actually play this whole game and enjoy it, but the current technical state make it a pure waste of time. Avoid.. Game is fun but it crashes way too often. Hearthstone + Monopoly + Tabletop + Drugs = DICETINY: The Lord of the Dice.. It may be in early access, however there is not a whole lot to keep me interested. This would be alright as a free demo.

Glad to have the development team coming back!. Just purchased this, thinking it looked amusing and it's cheap. You get what you pay for I suppose.
\$5.00 for a crash-on-start 'game'.

Hopefully future updates will fix the basic issues of not working.

What's truly annoying; I bought a copy for a friend. Now he's going to think I don't like him. With a name like mine, how could you ever think that?. Hoping for more content and multiplayer but I really like the concept of this game. Generally quick and easy. Somebody compared it to Hearthstone + Monopoly and that is spot on.. The Bastard child of Hearthstone and Monopoly, this game does quite well. It's currently early access, and by early access I mean it's brand freaking new. There's not much to do yet but even so, it's a lot of fun and has so much potential I'm confident it will turn into something great.

So far you've got a total of 5 playable characters, and 4 scenario battles you can play. You essentially play a hearthstone style minion game with cards and AP, while also using gold to buy resources (and sometimes use abilities) while you move around a twenty space board.

It is early access and as such has some glitches and issues, but I can definately see this becoming a great pvp game in the future.. I mean if you like hearthstone and board games, you will like this. As a huge table top and card game lover I highly recommend this game to anyone who likes fun, or enjoys life in it's full potential. Even though it has basically nothing right now, it's still a really enjoyable experience and it has huge potential to become the new Hearthstone. Basically if you don't buy the game you worship Satan and anal beads. Not that there's anything wrong with that ;). Fun game until the racist joke about Koreans made by my character. Way to go scumbag devs!

P.S.: This isn't a joke. Beat the "big, bad wolf" character and watch the dialogue afterwards. Your character quips that he will have his Korean friend come to cook and eat the "big, bad wolf" character. Get it? FUNNY, AMIRITE?!?!?!?. broken game. HORRIBLE HORRIBLE experience for me. CRASH CRASH CRASH every single game and the last game FROZE my computer up to where I almost couldn't get it going again. Thank gawd I'm a IT tech. ;))

I DO NOT recommend this game for quite awhile. It's broken beyond belief and just about everything is a crash waiting to happen.
